Dollar Bills. We will not be responsible for the loss of these as postal clerks can detect a letter containing a bill. We pay for money order so it is always best to get one.

C. O. D. by mail is a useless expense, costing 10c extra. If you want seeds C. O. D. send at least one-fourth of the amount as a guarantee and send 10c extra for C. O. D.

Address. Look at your order the second time to see that you have written your full address, state and all, and written it PLAINLY. Hundreds of orders are lost every year because the address is gone or not decipherable.

We Guarantee seeds to reach you safely; to be the varieties we sell them for; to grow under proper conditions and with proper care. We will replace free any failing in these respects if customers have reason to think the fault was in the seed. We cannot guarantee you a good crop as other conditions might prevent that. Our Only Guarantee is to Replace Seeds.

Plants are not sent with seeds but are mailed from greenhouse and usually follow a week or so later than seeds.

Parcel Post. All seeds sent by mail or parcel post at prices quoted. Notice, in many catalogues you have to add postage or pay express charges.

Errors. Keep a copy of your order; notice the checker's slip to see if we report any omissions. (If we report it, we will send soon as we get it). If not marked, report omission and we will correct. We have a most careful system of filling orders, still we might make a mistake.

We Are Usually Prompt, filling orders the day received or the next day. Bulbs and plants are not always sent out promptly in cold weather.

Choice Cabbage Seed

Our Danish Grown Cabbage Seed is the Finest the World Produces.

Copenhagen Market Cabbage

Danish Ball Head

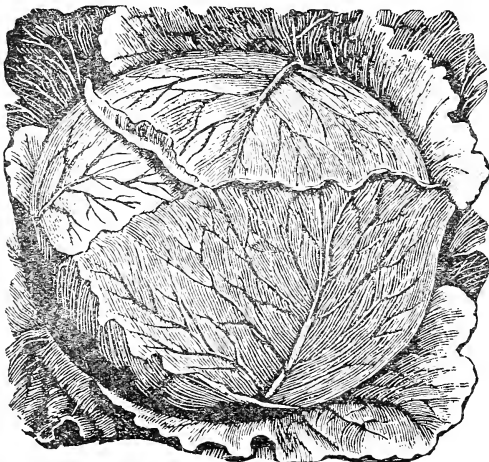

The Most Popular of all Hard Headed Winter Cabbage

The grand Cabbage on account of its hard heading, long keeping quality and great solidity has become the most popular winter sort. Heads almost round, fine grained, excellent flavor, good size and so heavy that they outweigh any other. Very reliable, sure header and will keep longer or ship farther than any other.

This variety is now grown more than all others combined for shipping. Large growers can depend on our stock being the very best the world produces. Where not specified we send Medium Stem but can supply the Short Stem strain. Pkt. 5c; $\frac{1}{2}$ oz. 12c; oz. 20c; $\frac{1}{4}$ lb. 70c; lb. \$2.45.

Glory Cabbage

A valuable and popular second early Cabbage producing large, handsome white, solid heads in August and September. Coming into market ahead of the ordinary Winter sorts, they usually command a good price. Heads are about as large and solid as the Ball Head and when stripped of outer leaves present a beautiful appearance in market. A uniform grower and only about 10 days later than the Wakefield. Pkt. 5c; $\frac{1}{2}$ oz. 15c; oz. 25c; $\frac{1}{4}$ lb. 90c; lb. \$2.90.

Surehead Cabbage

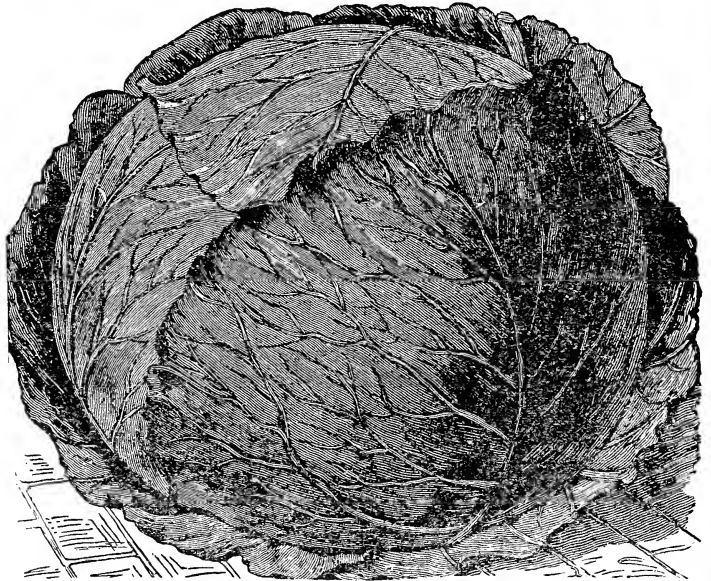

Copenhagen Market

Early Large Heading Cabbage

A wonderfully large, early Cabbage maturing with Early Jersey Wakefield. Considering its early season, the heads are remarkably large, averaging 5 to 10 pounds in weight. It is so solid that many more plants can be grown on an acre than is possible with most sorts. It has fewer outer leaves and it grows close to the ground on a short stem. The entire crop is exceptionally good. Earliness, ripening at one time, compact growth, large heads and high qualities are features which have made this Cabbage popular. Our seed of this is the choicest Danish grown. Pkt. 5c; $\frac{1}{2}$ oz. 15c; oz. 25c; 2 ozs. 45c; $\frac{1}{4}$ lb. 75c; lb. \$2.90.

Golden Acre Cabbage

This is an extra early strain of Copenhagen Market maturing about ten days earlier. It will mature heads in eighty days from time of sowing, measuring nine inches in diameter, with a uniform weight of five pounds. Pkt. 15c; oz. \$1.25; $\frac{1}{4}$ lb. \$4.00.

Danish Ball Head Cabbage.

Early Jersey Wakefield Cabbage

This variety has long been considered as the best early conical-type Cabbage. The heads are hard and solid with just a few outside leaves. Pkt. 5c; $\frac{1}{2}$ oz. 12c; oz. 20c; $\frac{1}{4}$ lb. 65c; lb. \$1.95.

Mammoth Wakefield

A splendid strain of Jersey Wakefield, about a week later than the earliest with heads twice as large, weighing from 5 to 10 pounds, each a good keeper and may be planted as a second crop to mature in autumn, if desired. It is much used by market gardeners to follow Jersey Wakefield; a first rate shipper, and in great favor with everybody who knows it. Pkt. 5c; $\frac{1}{2}$ oz. 15c; oz. 25c; $\frac{1}{4}$ lb. 70c; lb. \$2.25.

Surehead Cabbage

A Large, Sure Header for Home Use or Market

We have the best strain of Surehead, which is far superior to the old Drumhead. Produces large, round, slightly flattened heads of the finest quality. Whole fields with scarce an imperfect head. Pkt. 5c; $\frac{1}{2}$ oz. 12c; oz. 20c; $\frac{1}{4}$ lb. 60c; lb. \$1.95.

CABBAGE SEED--Continued

Early Winningstadt Cabbage

One of the solidest, surest headers for ordinary garden culture, heads where others fail and is bothered less with worms than any other sort. Heads heavy, solid, pointed, of finest quality and keeps well, especially when sown late. Pkt. 4c; oz. 12c; $\frac{1}{4}$ lb. 45c; lb. \$1.65.

Succession Cabbage

Especially recommended on account of its uniform size and shape; about a week later than Early Summer, but much larger heads, averaging 12 to 15 pounds in weight, every plant producing a fine, solid head. One of the surest varieties to make a crop under all conditions. Pkt. 5c; oz. 15c; $\frac{1}{4}$ lb. 45c; lb. \$1.75.

Autumn King Cabbage

The plant is of extra strong growth, with dark bluish-green leaves growing closely about the large, flattened heads. In good soil it will produce heads of enormous size. Requires a longer season for growth than do the smaller varieties. Pkt. 5c; oz. 18c; $\frac{1}{4}$ lb. 55c; lb. \$2.00.

Danish Summer Roundhead

Equally as solid as the Danish Ball Head, producing heads two to three weeks earlier. It is esteemed for the extreme solidity and great weight of the heads, as well as for its superior keeping qualities. The heads are unusually solid and beautifully white when trimmed. They are splendid keepers when sorted away for the late winter and spring, at which time the fine heads bring the highest market price. For selling in fall before the Ball Head is ready they bring an unusually high price. Best Danish seed. Pkt. 5c; $\frac{1}{2}$ oz. 15c; oz. 25c; $\frac{1}{4}$ lb. 75c; lb. \$2.90.

Danish Round Stonehead

KECKLEY SWEETS WATERMELON

Watermelon--Continued

Irish Grey Watermelon

This is a distinct Melon, the productive- and very valuable- ness is wonderful, producing more good merchantable Melons under the same conditions than any other variety; the eating quality is all that could be desired in a Watermelon, the sparkling red flesh is very sweet and entirely free from hard centers or stringiness, yet the flesh is very firm and compact and will not break when sliced. The size is uniformly large, color of rind, yellowish grey and almost as tough, as that of the Citron, ripens earlier than Tom Watson and will keep in good condition for a long time after picking and stand long distance shipping better than any other Melon; for comparison the grower claims it will carry 1,000 miles distance and ship back over the same route, then open as good as fresh picked Tom Watson. Another important feature, the rind

will not sunburn, and will keep in good condition for several days in the sun after becoming ripe, while all dark rind Melons will blister yellow on the top, which renders it unsaleable. The Irish Grey is beyond the experimental stage and you need not hesitate to plant it extensively. It is the best home market Melon as well as the best shipper. Pkt. 5c; oz. 10c; ¼ lb. 25c; lb. 90c.

Pkt. 4c; oz. 8c; ¼ lb. 15c; lb. 45c; 4 lbs. \$1.50 by mail.

BLOOMSDALE SAVOY SPINACH

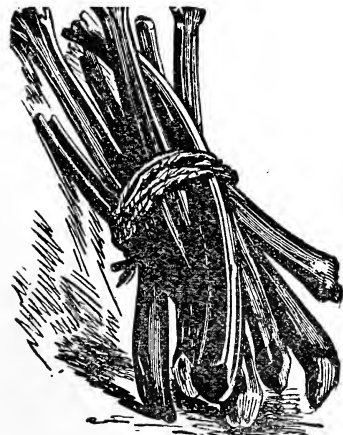

This sort is known also as Norfolk Savoy Leaved. It is a very early variety and one of the best to plant in autumn for early spring use. The plant is of upright growth, with thick, glossy, dark green leaves of medium size, pointed but quite broad, and crumpled or blistered like those of Savoy Cabbage. It is hardy and grows rapidly to a suitable size for use, but runs to seed quickly in warm weather. Suitable for the home or market. Pkt. 4c; oz. 8c; ¼ lb. 15c; lb. 45c; 3 lbs. or over 38c per lb. by mail.

ALL SEASONS THICK LEAVED SPINACH

This plant is small, with lustrous green leaves, which are short, broad, very thick, and of so great substance that they lose less bulk cooking than any other. The plant forms a compact, dense rosette perfect in color and substance, and unequalled in flavor. Remains in fit condition to use longer than any other. Pkt. 5c; ½ lb. 15c; lb. 45c; 3 lbs. or over 38c per lb. by mail.

King of Denmark Spinach

This new variety will eventually replace all others for spring planting, as it is very slow to go to seed, continuing to grow and hold its fine quality for weeks after all other sorts have gone to seed. It makes a very quick and low growth, producing an abundance of dark green leaves which are of large size and attractively crumpled. It is ready for use as soon as other varieties of spinach and the leaves hold up remarkably well after being cut.

GIANT VICTORIA RHUBARB Pkt. 5c; ½ oz. 10c; oz. 18c; ¼ lb. 60c.

RHUBARB Giant Victoria

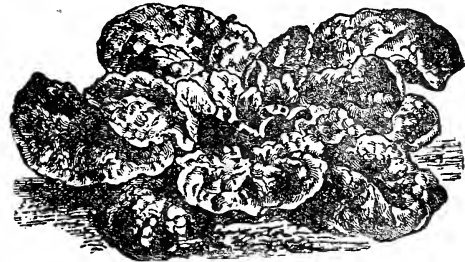

Produces long, thick, heavy, juicy stalks 2 feet or over in length and of the best quality. This should supercede the small sort usually grown. Nothing in spring is so appetizing and healthful for pies, sauces, etc., and the fermented juice makes excellent wine. Produces crop to pick in two years.

New Triumph Spinach

This new Spinach surpasses all other sorts. Plants are of very compact, but prostrate growth. They are composed of many short-stemmed leaves, which are of much thicker and heavier texture than any other Spinach in cultivation. They are heavily crumpled and blistered, of dark green color, and do not wilt or run to seed as quickly as other sorts, but will remain in good marketable condition a month longer than any other sort. On account of its thick, firm leaves it retains its freshness during the hot summer months, and is the best variety to be sown in the spring and also continuously at intervals all summer, so that this delicious, healthful vegetable can be enjoyed, not only during the cool weather, but during the hot months as well. Pkt. 5 cts.; oz. 10 cts.; ¼ lb. 20 cts.; lb. 60 cts.; 2 lbs. for \$1.00; 5 lbs. for \$2.00.

New Zealand Spinach

Unlike true Spinach in type and in that it thrives during hot weather and in any soil rich or poor. The tender shoots are of good quality and may be cut throughout the summer. The plant becomes very large and spreading. The leaves are comparatively small, broad and pointed. Plant three or four seeds in hills two feet apart each way. Germination of the seed can be hastened by soaking in warm water twenty-four hours. Pkt. 5 cts.; oz. 10 cts.; 2 oz. 15 cts.; ¼ lb. 22 cts.; lb. 65 cts.; 4 lbs. \$2.00.

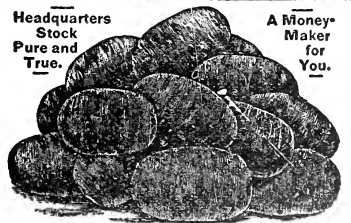

BLOOMSDALE SAVOY SPINACH

TOMATO

Earliana Tomato

Special Selected Strain

The Earliana has for several years been the standard extra early. Our grower has worked up a special strain of this, improving it in every possible way. Our strain of this first early sort is earlier and decidedly superior to much that is sold as Sprks' Earliana, and the extreme earliness of its large, smooth fruits makes it a very desirable Tomato for market gardeners, as well as desirable for the home garden. The vines are small, but vigorous and productive. The fruits are scarlet, medium to large, nearly round and exceptionally smooth for so early a variety. The fruits are borne in clusters near the base of the plant and the bulk of the crop ripens very early. Pkt. 5c; ½ oz. 14c; oz. 25c; ¼ lb. 90c; lb. \$3.00.

A SEED AND SOIL INOCULANT
That Increases Crop Production and Greatly Improves the Soil

Best Bacteria

For Bigger Crops—Better Soil

Every time you plant any kind of field or garden peas, beans, clover, peanuts, vetch or alfalfa, inoculate the seed with these cultures of nitrogen. Unless your soil is unfavorable, having the proper bacteria on your seed often means an increase of 50 per cent to 100 per cent in the crop yield, an even stand, and great numbers of nodules on roots which deposit in your soil nitrogen fertilizer (nitrates) worth \$20 to \$30 an acre as fertilizer for grain, cotton, tobacco, fruit or other crops grown on the land afterwards.

INEXPENSIVE—EASY TO USE

Not only is it important that you inoculate your seed, but it is just as important that you use a thoroughly reliable inoculant. Cultures are put up in two forms, either on jelly in bottles, or on soil in cans, and of the several brands on the market we handle the best of each kind, both reasonably priced and prepared for us in laboratories that specialize on preparing the biggest result-producing bacteria. You can absolutely depend upon them. Pour on the seed and plant in the usual way—directions on each container.

When you order, please state variety of seed you wish to treat. We have always fresh stock for: Alfalfa, Crimson, Sweet, White, Alsike, Hubam, Bur, Lespedeza, Japan and other clovers; Soy, Velvet, Lima and all beans; Cow Peas, Sweet Peas, Beggarweed, Sesbania, Peanuts, Vetch, etc.
